I am a self taught front end web developer with strong programming skills in HTML, CSS, JAVASCRIPT, and REACT. I've completed a number of web programming courses and developed a lot of wonderful projects utilizing the aforementioned technologies for both personal and professional purposes. I also have expertise with version control systems like GitHub. My love for developing user-friendly web applications has motivated me to become efficient in integrating UI designs and utilizing the current industry standards.

PROJECT

- Built a Facebook clone with HTML, CSS and JavaScript
- Built a responsive and functional twitter clone with React.js.
- Worked with some other experienced developers to build a valuation application.
- Developed the frontend of an E-library for my department, where you can access and download the materials needed for a particular semester.
- Developed a blog page with HTML, CSS and JavaScript, also recreated it with React.js.
